

10 good reasons to select a PlymoVent system. But it all comes down to ...1

1. **G**uaranteed *consistent performance with a PlymoVent system*
2. **U**ser friendly *with a simple design, firefighters use it with ease*
3. **A**daptable *can be retrofitted into existing fire stations or built into new construction*
4. **R**esponsible *for installing over 30.000 systems in the world, making PlymoVent the #1 manufacturer of vehicle exhaust systems to the fire service*
5. **A**llowances *can be achieved by reduced worker compensation claims as well as insurance costs*
6. **N**ational *codes and local standards are met when installing our system*
7. **T**ested *and manufactured since 1988. It is not a prototype or new concept*
8. **E**stablished *professional support dedicated to educating your training officers and firefighters with on-site training, SOP's and educational materials*
9. **E**xpandable *system eliminates loss of investment by allowing for future expansion*
10. **D**ependable *with 100% capture and removal of poisonous, carcinogenic and volatile gases and diesel soot from your fire apparatus. This allows your department to afford and justify the purchase of this system through health and safety risk management control*
